ALBERT, GEORGE E. Asymptotic forms for a general class of hypergeometric functions with applications to the generalized Legendre functions 281
BAER, REINHOLD. Duality and commutativity of groups 824
BARONE, HENRY G. Limit points of sequences and their transforms by methods of summability 740
BELL, P. O. The first canonical pencil 784
BERNSTEIN, B. A. Groups and Abelian groups in terms of negative addition and negation 871
BIRKHOFF, GARRETT. The mean ergodic theorem 19
BOAS, R. P., JR. Oscillating functions 394
BOCHNER, S. A uniqueness theorem for analytic almost-periodic functions 937
CARLITZ, L. Some sums involving polynomials in a Galois field 941
CASSITY, C. RONALD. The maps determined by the principal curves associated with five and six points in the plane 146
CHANLER, JOSEPHINE H. The invariant theory of the ternary trilinear form 552
CLARK, C. E. Simultaneous invariants of a complex and subcomplex 62
COBLE, ARTHUR B. Configurations defined by theta functions 479
COBURN, NATHANIEL. Surfaces in four-space of constant curvature 30
COHEN, L. W. On imbedding a space in a complete space 174
COURANT, R. Conformal mapping of multiply connected domains 814
DENJOY, A. Topological and metrical points of view in the theory of sets and functions of real variables 806
DILWORTH, R. P. Non-commutative arithmetic 270
DINES, L. L., AND MOSKOVITZ, DAVID. Convexity in a linear space with an inner product 520
DOBBIE, J. M. A generalized Lambert series 325
DOUGLAS, JESSE. The analytic prolongation of a minimal surface over a rectilinear segment of its boundary 21
DUNFORD, NELSON. A mean ergodic theorem 635
EVERETT, C. J., JR. Annihilator ideals and representation iteration for abstract rings 623
FELLER, WILLY. Completely monotone functions and sequences 661
GRANT, ANNA. Surfaces of negative curvature and permanent regional transitivity 207

GRAVES, LAWRENCE M. The Weierstrass condition for multiple integral variation problems 656
GREEN, J. W. Functions which assume rational values at rational points. 164
HABERZETLE, MARY. The Waring problem with summands x^m, $m \geqq n$.. 49
HALMOS, PAUL R. Invariants of certain stochastic transformations: The mathematical theory of gambling systems 461
HALPERIN, ISRAEL. Additivity and continuity of perspectivity 503
HAMILTON, HUGH J. Preservation of partial limits in multiple sequence transformations 293
HARROLD, O. G., JR. Hereditary arc sums 111
HARROLD, O. G., JR. The non-existence of a certain type of continuous transformation 789
HEDLUND, GUSTAV A. The measure of geodesic types on surfaces of negative curvature 230
HESTENES, M. R. Generalized problem of Bolza in the calculus of variations 309
HILLE, EINAR. Contributions to the theory of Hermitian series 875
HYERS, D. H. Pseudo-normed linear spaces and Abelian groups 628
JACOBSON, N. Cayley numbers and normal simple Lie algebras of type G.. 775
JAMES, R. D. Integers which are not represented by certain ternary quadratic forms 948
JEFFERY, R. L. Functions of bounded variation and non-absolutely convergent integrals in two or more dimensions 753
JONES, F. BURTON. Certain equivalences and subsets of a plane 133
KASNER, EDWARD. Lineal element transformations of space for which normal congruences of curves are converted into normal congruences.. 72
KELLEY, J. L. Fixed sets under homeomorphisms 535
LANE, E. P., AND MACQUEEN, M. L. The curves of a conjugate net 692
LARGUIER, EVERETT H., S. J. A matrix theory of n-dimensional measurement 729
LEIGHTON, WALTER. Convergence theorems for continued fractions 298
LEWIS, DANIEL C., JR. Formal power series transformations 794
MCSHANE, E. J. The Jacobi condition and the index theorem in the calculus of variations 184
MAC LANE, SAUNDERS. Modular fields. I: Separating transcendence bases. 372
MACQUEEN, M. L., AND LANE, E. P. The curves of a conjugate net 692
MOSKOVITZ, DAVID, AND DINES, L. L. Convexity in a linear space with an inner product 520
ORE, OYSTEIN. Contributions to the theory of groups of finite order 431
ORE, OYSTEIN. A remark on the normal decompositions of groups 172
PETTIS, B. J. Differentiation in Banach spaces 254
PETTIS, B. J. A proof that every uniformly convex space is reflexive 249
REID, WILLIAM T. Isoperimetric problems of Bolza in non-parametric form 675

REID, WILLIAM T. The Jacobi condition for the double integral problem of the calculus of variations 856
ROBERTS, J. H. Note on topological mappings 428
ROBERTSON, M. S. The variation of the sign of V for an analytic function $U + iV$ 512
ROBINSON, RAPHAEL M. A generalization of Picard's and related theorems 118
ROSSER, BARKLEY, AND WALKER, R. J. The algebraic theory of diabolic magic squares 705
SHAW, JAMES BYRNIE. Algebras defined by groups whose members are of the form A^xB^y 839
SHEFFER, I. M. Some properties of polynomial sets of type zero 590
SHOHAT, J. A differential equation for orthogonal polynomials 401
SINGLETON, ROBERT. The characterization of flat projective spaces by their differential invariants 39
SPENCER, VIVIAN EBERLE. Persymmetric and Jacobi determinant expressions for orthogonal polynomials 333
TAYLOR, A. E. The extension of linear functionals 538
TOMPKINS, C. Isometric embedding of flat manifolds in Euclidian space 58
ULRICH, F. E. The problem of type for a certain class of Riemann surfaces 567
VANDIVER, H. S. On Bernoulli's numbers and Fermat's last theorem (second paper) 418
VANDIVER, H. S. Certain congruences involving the Bernoulli numbers 548
WALKER, R. J., AND ROSSER, BARKLEY. The algebraic theory of diabolic magic squares 705
WARD, MORGAN. The algebra of lattice functions 357
WEISNER, LOUIS. The subgroup of order n of a transitive group of degree n and class $n - 1$ 84
WEYL, HERMANN. Invariants 489
WHYBURN, G. T. The existence of certain transformations 647
WIENER, NORBERT. The ergodic theorem 1
ZUCKERMAN, HERBERT S. Identities analogous to Ramanujan's identities involving the partition function 88
